

Update of XIS contamination model files

- XIS1 chemical composition and XIS3 spatial distribution are updated to better represent the changes in the low energy response.
- These updated contamination models (ae_xi*_contami_20150914.fits) newly include the data obtained between October 2014 and April 2015.
- **xissimarfgen** uses the latest contami files automatically. Use the **contamifile** option to use previous versions if necessary.

RXJ1856.5-3754 (2014/10/23) fitting with (a) old and (b) new contamination file.
