

# The View from HQ: Astrophysics at NASA

Jeffrey J. E. Hayes
Program Executive for MO & DA

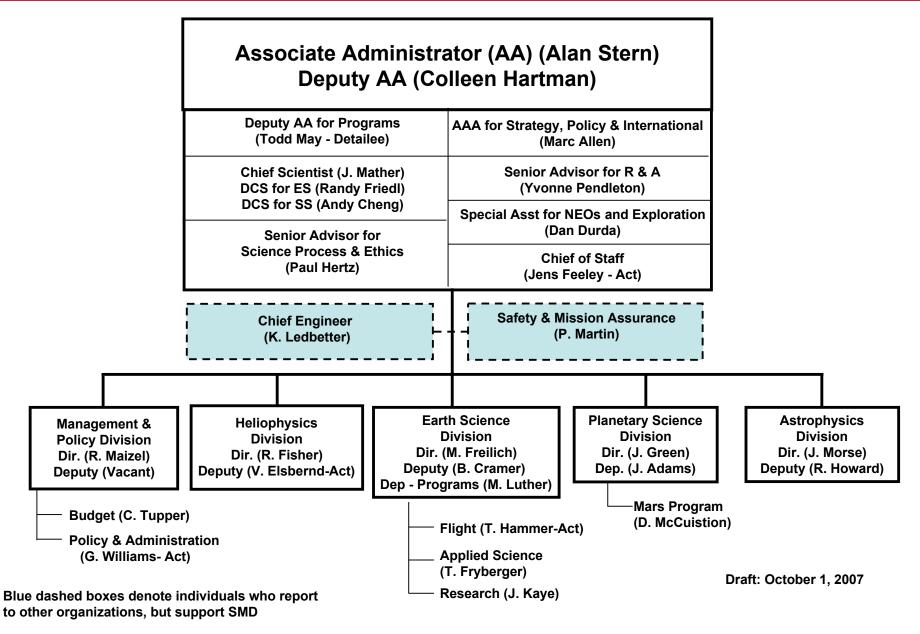

**October 15, 2007** 

#### Science Budget Strategy

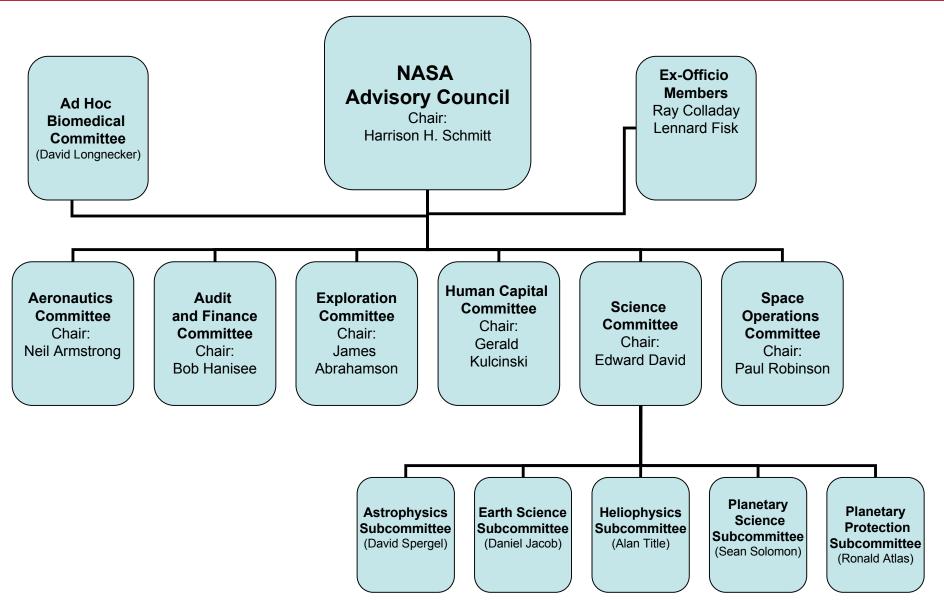

- After adjusting for Full Cost Simplification, Science gets 1% growth per year after FY07
  - No change from out-year projections in the FY07 Budget
  - Growth of 2.4% from FY2012 to FY2013
- Science's goal is to manage each and every one of our Programs and Projects within budget and on schedule
- When budget growth does occur, or when science priorities are changed, we propose adjustments as necessary
- Strategy for Adjustments
  - Develop an executable program based on strategic National Academy science priorities

## **NASA Advisory Council Structure**

## **Astrophysics Directions**

- Numerous recent community reports call for re-establishing balance among small, medium, and large missions in the Astrophysics program:
  - Astronomy & Astrophysics Advisory Committee 2007 Annual Report: "The balance between small, medium and large programs in the NASA Astrophysics Division has been undermined. The AAAC recommends that the funding "wedge" in FY09/10 be used to add some funding for R&A and small missions, to rebalance the program."
  - NRC 2007 NASA Astrophysics Program Assessment report: Recommendation #1: "NASA should optimize the projected scientific return from its Astrophysics Program by ensuring a diversified portfolio of large and small missions that reflect the scientific priorities of the decadal review and by investing in the work required to bring science missions to their full potential: e.g., technology development, data analysis, data archiving, and theory."

## Astrophysics Division What's New

- Exciting new capabilities to launch within two years: GLAST, HST-SM4, Kepler, Herschel/Planck, WISE
- New SMD focus on Strategic Investments in: Research and Analysis, Data Analysis, and Suborbital Opportunities.
  - Re-instatement of NuSTAR mission
  - Next Small Explorer (SMEX) AO:
    - pre-proposal conference Nov. 6 in Washington DC (NOI Nov. 16)
    - Proposals due January 15, 2008
      - -Mission cost cap of \$105M (FY08\$), not including launch vehicle
      - -Mission of Opportunity allocation of \$70M (FY08\$)
    - · Selections anticipated 4 months after proposals due
      - -Approximately 6-8 Phase A concept studies
      - -Anticipate selecting up to 3 for flight
    - · New experience standards for PI, but only PI
  - Strategic Mission Concept Studies NRA (proposals due Nov 20)

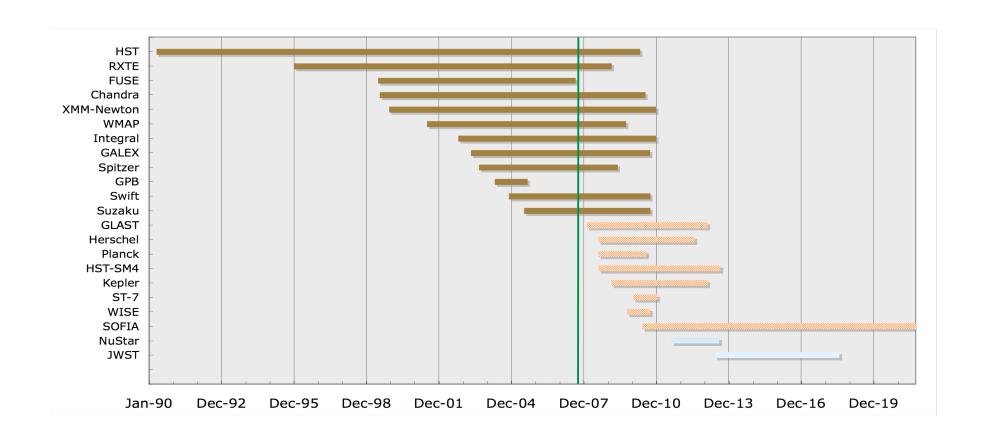

### **Looking Forward**

- BEPAC report recommendations
  - JDEM first for development and launch
  - Technology investments in LISA and other missions
  - Cost estimates (70% confidence) for total portfolio >\$11B
- ExoPTF recommendations imminent
- Assumptions for future planning
  - Approximately flat Astrophysics Division Budget
  - Currently planned facilities operate at least as long as planned for (but most will likely last longer)
  - Complete current missions in development
  - Basic Research & Analysis (R&A) funding will go up, or at worst remain the same
  - Mission funding profile shapes will resemble those in the past

## **Astrophysics Timelines**

Tan: mission in development, blue: mission in formulation

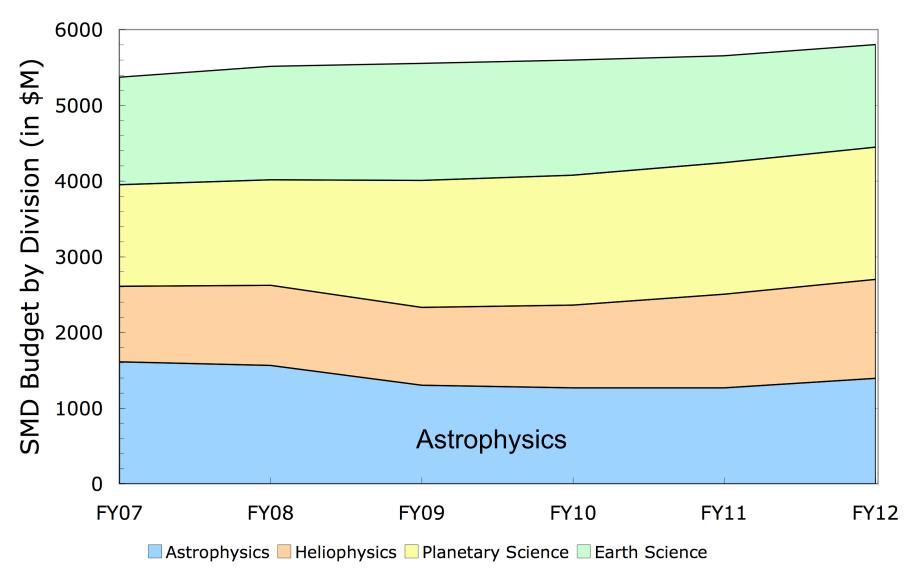

## **Astrophysics Missions**

Mission	Launch	Launch Vehicle	FY07 Budget	Change	Phase
HST	Apr-90		same		Implementation - Extended Operations
RXTE	Dec-95		same		Implementation - Extended Operations
FUSE	Jun-99		same		Termination by 12/31/2007
Chandra	Jul-99		same		Implementation - Extended Operations
XMM	Dec-99		same		Implementation - Extended Operations
WMAP	Jun-01		same		Implementation - Extended Operations
Integral	Oct-02		same		Implementation - Extended Operations
GALEX	Apr-03		same		Implementation - Extended Operations
Spitzer	Aug-03		same		Implementation - Prime Operations
Gravity Probe - B	Apr-04		same		Implementation - Post-Op Data Analysis
Swift	Nov-04		same		Implementation - Extended Operations
Astro-E2/Suzaku	Jul-05		same		Implementation - Prime Operations
GLAST	Nov-07	Delta II	Sep-07	+2 mos.	Implementation - Development
HST SM-4	Aug-07	STS-125/OV-104	Dec-07	+7 mos.	Implementation - Development
Herschel	Jul-08	Ariane 5	Jul-07	+12 mos.	Implementation - Development

#### **Astrophysics Research Budget**

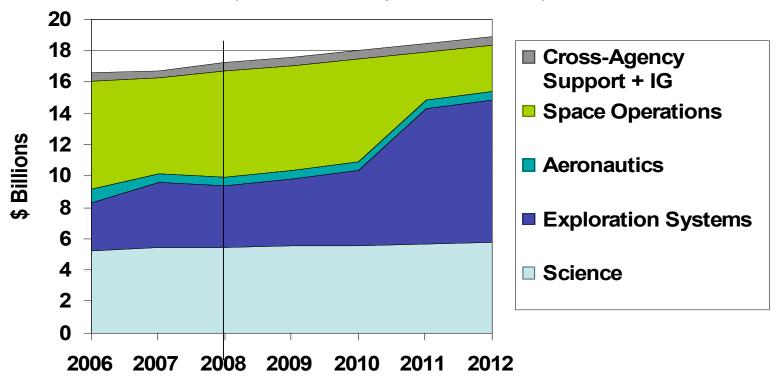

For FY2007, the following aggregates the competed Astrophysics research budget excluding flight hardware development

- "Astrophysics R&A" (really ST&T) ......\$50M
- Data analysis (other than "Astrophysics R&A").....\$88M
  - Mission specific General Observer/Guest Investigator programs
  - Archival data analysis programs
- - PI teams for missions and instruments selected through AO
  - Additional team members selected through competition
    - Participating scientists, interdisciplinary scientists, science working group members, etc.
- Total Astrophysics research and data analysis funding .....~ \$213M
